DETAILED ACTION

ART REJECTION:

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-9,15-17,23-27, and 30-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Pack-Harris(6,195,612).**

-- In considering claim 1, the claimed subject matter that is met by Pack-Harris(Pack) includes:

1) the receiving, storing, and processing the clinical data from a clinical system to an expert system, generating and sending an alert, and communicating at least one of a synchronous alert interface and an outbound alert interface is met pharmacies(30) which input and store data and sends the data to the health care plan computers for analysis of the data and sending the analyzed data back to the pharmacy(see: column 4, lines 5-54).

-- With regards to claim 2, the audit information and updating an audit log when an alert has been dismissed is met by the reports generated by the pharmacy benefit management system which includes updated information(see: column 8, lines 40 et seq).

Art Unit: 2632

-- Claims 3-9,15-17,23-27, and 30-31 recite subject matter that is met as discussed in claim 1 above(see: column 4,lines 5-54).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-14,18-22, and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pack-Harris.

-- In considering claims 10-14,18-22, and 28-30, the examiner takes Official Notice that use of alert messages according to proprietary message definitions, industry standard message definitions, HL7 protocol, receiving clinical data from an interface engine disposed on a clinical module, and having computer executable instructions for database systems are well known in the art.

It would have been obvious to one ordinary skill in the art at the time the invention was made to incorporate the above stated means into the system of Pack-Harris, since this would have allowed efficient communication of information in the system by providing structured dissemination of information in the system.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DARYL C. POPE whose telephone number is 571-272-2959. The examiner can normally be reached on M-TH 9:00-7:30.
